however/despite/other/leaders/extraordinarily/but/inspiring/successful/their/by

Our world knows many hugely successful female leaders from a wide range of industries, including politics, fashion, design, music, entertainment and science. What do these women possess that has enabled them to become so successful? How have they managed to reach out to millions of people, capturing the hearts and minds of customers, their audience, and created both a huge following and a thriving business, employing thousands of professionals, their audience year after year, becoming living legends and role models for aspiring female leaders, leaving a legacy through their mere personalities, admired everyone? Success is an iceberg. When we learn about extremely leaders, we tend to see the tip of the iceberg. What we may fail to see is the hard work behind their success, often, not always, preceded by tragic events as in the case of Oprah Winfrey, who was a victim as a child. her poor and tragic childhood, she knew how to fight her way out of the difficulties. She became the Queen of All Media, one of the richest individuals in the United States, one of the greatest philanthropists throughout North American history, a role model and influencer whose life work has helped millions of people across the Globe.

According to a definition, 'Brain Drain', academically also known as the "human capital flight" is the large scale migration of highly educated, skilled and talented people of less economically **(advance)** countries to highly rich and developed countries of the world due to conflicted issues, political instability and lack of opportunities in the developing countries. **(global)**, relocation of intellectuals is as old as mankind. This terminology of Brain Drain originated in 1960, when most of the intellectuals like **(science)** and engineers who were the real assets or the future of any country, emigrated from United Kingdom to America. The **(solved)** issue of Brain Drain is happening all over the world for the sake of better working conditions **(include)**, the island nations of the Caribbean, the anterior colonies of Africa and mostly in federal economies like the Soviet Union previous Eastern Germany, where aptitudes **(to be)** not monetarily salaried. This phenomenon was not as severe till 1960's but with the huge capacity lopsidedly migrate to West Germany and North America from less **(develop)** regions. Substantial exoduses of skilled people were apparent at altered epochs of the economic **(grow)** of the countries of Europe and North America. However, with the progress in science and technological fields, only the intellectuals and highly qualified brains were of extraordinary mandate in highly developed countries.
