### The text

Last summer holidays in Italy , I was walking around the city of Rome , enjoying the weather , doing some shopping and taking pictures . At noon , I felt a bit tired and hungry . There was a restaurant just across the road . So, I headed there straight away . First of all , I wanted to share my pictures with friends . So , I first asked the waiter for the WIFI code and he told me 'eat first ' . Maybe in this restaurant clients should eat before having the code . I ordered my food . It was "fish & chips " . Then, , I asked the waiter again for the code and he said with a smile . you should write the words eat first to be connected . It was really funny but it was time to leave and visit other monuments . I visited the Leaning Tower of Pisa and took selfies there . The day was over . I was tired but happy .
